RESEARCH INTERESTS

I am mainly working on the (complicated) game-theoretic interaction between the servicing platform and served targets (e.g., advertising platform v.s. advertisers, e-commerce platform v.s. sellers, platform v.s. users, etc.), mainly in the following aspects:

- How can the platform design algorithms to reach its goal or help targets reach their goals?
- How can the targets conversely exploit the platform's algorithm to better benefit themselves?
- How can one simultaneously benefit the platform and their targets?

I also work on various topics in the interplay of computer science and economics, known as algorithmic game theory.

PROFESSIONAL EXPERIENCE

Algorithm Expert 2026.08 –
Taobao & Tmall Group of Alibaba, Chaoyang, Beijing, China

Postdoctoral Researcher 2026.08 –
Taobao & Tmall Group of Alibaba, Chaoyang, Beijing, China
Renmin University of China, Haidian, Beijing, China
Gaoling School of Artificial Intelligence
Advisor: Jian Xu, Qi Qi

EDUCATION

Ph.D. of Science 2021.09 – 2026.07
Peking University, Haidian, Beijing, China
Center on Frontiers of Computing Studies (CFCS), School of Computer Science
Advisor: Xiaotie Deng

Bachelor of Science, Summa Cum Laude 2017.09 – 2021.07
Peking University, Haidian, Beijing, China
Turing class of AI
Intelligence Science and Technology
School of Electronics Engineering and Computer Science
GPA: 3.768 / 4
